

# LANG JU

AI Product Engineer | Full-Stack AI Products | GTM Automation

St. Louis, MO | +1-669-295-8745 | langju123456@gmail.com | linkedin.com/in/langju | github.com/langju123456

## SUMMARY

AI product engineer with an M.S. in Information Systems Management building full-stack internal AI applications, GTM workflows, and SaaS integrations. Uses Python, FastAPI, PostgreSQL, JavaScript, Azure, Docker, and LLM evaluation to turn ambiguous stakeholder needs into reliable software.

## PROJECT HIGHLIGHTS

### BuildLog | Full-Stack Internal AI Product for GTM Workflows

- Independently built a FastAPI/JavaScript full-stack internal AI product with Pydantic and SQLAlchemy/PostgreSQL, automating a five-stage evidence-to-GTM workflow; persisted 60+ versioned artifacts and averaged 8.97/10 across 8 evaluated runs.
- Designed an idempotent database-backed job workflow with transactional claims, bounded retries, Alembic migrations, request IDs, health checks, Prometheus metrics, and Blob artifact mirroring; validated 500 ASGI requests at 0% errors and 34.6 ms p95.
- Integrated LinkedIn and X with OAuth 2.0/PKCE and live HTTP 201 publications; containerized the service and implemented Azure Container Apps, PostgreSQL/Blob, and GitHub Actions CI/CD architecture, backed by 270 tests.

### Project Lead | Ardent Mills Digital Transformation Capstone

- Led a six-person team and partnered with client leaders through 14 stakeholder meetings to define supply-chain data, integration, and governance problems for a food manufacturing enterprise.
- Translated EDI, API, supplier collaboration, and master-data findings into an iterative transformation roadmap; directed 100+ pages each of research and presentation material for client management.

### AI Research Agent | Agentic RAG & Tool-Using Workflow

- Prototyped a ReAct research agent for multi-step retrieval, tool/API use, memory, and Markdown/PDF reporting with LangChain and ChromaDB; earned the Hugging Face Agents Course Certificate of Excellence.

## EDUCATION

### Washington University in St. Louis    Graduated: December 2025

*Master of Information Systems Management | GPA: 3.42*

Relevant Coursework: Generative AI & LLMs (A+), Software Design & Architecture, IT Architecture, Enterprise Data, Cybersecurity, Data Structures & Algorithms; applied Azure, Docker, and Kubernetes labs

### University of Florida    Graduated: May 2023

*B.S.B.A. in Information Systems*

Relevant Coursework: Business Systems Design, Database Management, Information Systems & Operations Strategy

## TECHNICAL SKILLS

- Full-Stack & Data: Python, FastAPI, SQL/PostgreSQL, JavaScript, HTML/CSS, REST APIs, SQLAlchemy, Alembic
- AI & AI-Native Development: LiteLLM, OpenAI APIs, Claude Code, Codex, Cursor, ReAct, tool/function calling, agentic RAG
- Reliability: Pydantic, idempotency, durable jobs, structured outputs, evaluation, Prometheus, structured logging, pytest
- Cloud & Delivery: Azure Container Apps, Blob Storage, Managed Identity, Docker, Kubernetes, GitHub Actions CI/CD, OAuth 2.0/PKCE

## WORK EXPERIENCE

### Overseas Technical Sales Engineer (Full-Time)

*Nanjing Kangni Mechanical & Electrical Co., Ltd. | July 2023 - May 2024 | Nanjing, China*

- Partnered with sales, engineering, production, and customer teams on 2-3 overseas rail-transit bids and technical projects, translating requirements into proposals and coordinated delivery plans.
- Analyzed CRM/ERP workflows with Python, surfaced process and data gaps, and converted ambiguous customer and operational needs into technical documentation, project updates, and cross-functional actions.

### Market Data Analytics Intern (Part-Time)

*Qidian Inc. | October 2021 - August 2022 | Remote*

- Analyzed user behavior, survey data, and customer segments with Python and JMP, translating findings into product and marketing recommendations for non-technical stakeholders.
